

24, January 2022

Dear Healthcare Professional,

This letter is to inform you about an upcoming change on the bag size of WG Critical Care's 200mcg/50mL (4mcg/mL) Dexmedetomidine HCl in 5% Dextrose premix bag. The fill volume will not change; however, the bag size will be smaller.

The change is a 50mL fill volume in a 50mL flexible plastic container from the current 50mL fill volume in a 100mL flexible plastic container. The bag will be smaller in shape and approximately 30% slimmer in size. For additional information and photos of the new bag please visit our web-site at www.wgccrx.com. All other features of the 200mcg/50mL Dexmedetomidine remain the same;

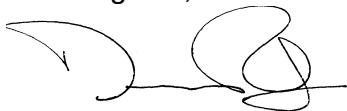

- Dexmedetomidine is indicated for both ICU and Surgical use¹
- Same active ingredient as Precedex®²
- Bag and bag ports are free of natural rubber latex, DEHP and PVC³
- Bar Coded at the individual unit of use
- A Ready-To-Use formulation saves time, frees up resources and reduces waste

NDC Number	Total Amount	Fill Volume	Concentration	Container Type (New)	Pack Size
44567-602-24	200mcg/50mL	50mL	4mcg/mL	50-mL flexible plastic bag	24

Should you have additional questions regarding this change, please contact Medical Information at the following Phone number 1-866-562-4708.

To order WGCC products, please contact your wholesaler or call Customer Service at 1-888-493-0861.

Best Regards,

Deena Reyes
Chief Commercial Officer
WG Critical Care, LLC.
